

COMMUNICATIONS IN PHYSICS

Volume 34, Number 2

June 2024

PAPERS

- Comparing receptor binding properties of SARS-CoV-2 and of SARS-CoV virus by using unsupervised machine learning models** 99
Cao Phuong Cong, Hien T. T. Lai, Ly H. Nguyen, Anh D. Phan, Agata Kranjc, Tien-Cuong Nguyen, Duc Nguyen-Manh and Toan T. Nguyen
- Scotogenic gauge mechanism for neutrino mass and dark matter** 115
Phung Van Dong and Nguyen Huy Thao
- On the CP violation in the neutrino sector with A_4 flavour symmetry** 125
Phi Quang Van, Nguyen Anh Ky and Tran Tien Manh
- Effect of time-dependent inter-particle interaction on the dynamics of a dissipative double-well Bose-Einstein condensate** 139
Kalai Kumar Rajagopal and Ruqi Zhang
- Size Dependence of Melting Process of Armchair Hexagonal Boron Nitride Nanoribbon** 151
Hang T. T. Nguyen, Tran Van Luong and Trinh T. Ngo
- Hybridization of an s-wave impurity with graphene lattice** 163
Hoa T. M. Nghiem, Tien-Lam Pham, Ngoc-Linh Nguyen, Hung T. Dang
- Study on optical properties of hexagonal lattice photonic crystal fibers infiltrated with heavy water** 179
Trong Dang Van, Bao Tran Le Tran and Lanh Chu Van
- Fabrication of uniform microlasers using conventional printing technology** 193
Ta Van Duong, Hoang Thi Thuong, Nguyen Thanh Duy, Nguyen Minh Hoang and Nguyen Van Toan
