

# JOURNAL OF COMPUTER SCIENCE AND CYBERNETICS

Volume 31, Number 2, 2015

## Table of Contents

- 83 **Experimental system for the optimization of the parallel manipulator control**  
Nguyen Xuan Vinh, Le Quoc Ha, Nguyen Ngoc Lam,  
Le Hoai Quoc, and Nguyen Minh Thanh
- 97 **Constrained output tracking control for time-varying bilinear systems via RHC with infinite prediction horizon**  
Nguyen Doan Phuoc and Le Thi Thu Ha
- 107 **A new control method for stereo visual servoing system with Pan-tilt platform**  
Le Van Chung and Pham Thuong Cat
- 123 **A predictive control approach for bidirectional DC-DC power converter in supercapacitor energy storage systems**  
Pham Tuan Anh, Nguyen Van Chuong, Cao Xuan Duc,  
and Nguyen Phung Quang
- 133 **Factorization forecasting approach for user modeling**  
Nguyen Thai-Nghe and Lars Schmidt-Thieme
- 149 **Building ontology based-on heterogeneous data**  
Ta Duy Cong Chien and Phan Thi Tuoi
- 159 **Some properties of the positive boolean dependencies in the database model of block form**  
Tran Minh Tuyen, Trinh Dinh Thang, and Nguyen Xuan Huy
- 171 **An application of feature selection for the fuzzy rule based classifier design with the order based semantics of linguistic terms for high-dimensional datasets**  
Pham Dinh Phong
